*Ed. note: The article below is by Yuji Takenoshita, a graduate student in the Department of Zoology, Kyoto University who returned this year from Congo where he conducted socio-ecological research on tschego chimpanzees (*Pan troglodytes troglodytes*) in the Ndoki Forest from September 1995 to May 1996. He kindly provided us with an update on the status of research by his team.*

1: Study site: Nouabalé-Ndoki National Park

Nouabalé-Ndoki National Park (Ndoki) is located in the northern end of Congo, near the border between Cameroun, Central African Republic and Congo. The national park was established in 1993 and is managed by the Congolese government in cooperation with the Wildlife Conservation Society (WCS). For details of conservation
